Specific security solutions for Industry

## Biometric Attendance Access Control System

Biometric Time Attendance series includes cutting-edge hybrid biometric verification technology products and solutions including Fingerprint Scanners, Access Control System, Face Detection Devices, Biometric Attendance Devices, Face Recognition Attendance System, Time Management Software and more. It provides a full range of solutions including various Fingerprints, RFID, Facial Recognition Technology and Palm Detection.

Access Control Systems play a crucial role in securing Business from unauthorized access or external intrusions and permits only those who are permitted with official authorization. The digital access control systems not only enable the entry or exit of users but also monitor and record respective individuals in real-time, which makes track recoding a lot easier, access Control Systems can be used to limit access to sensitive data rooms, server rooms, critical workplaces, laboratories containing high-end equipment as well as entry doors. Without access control systems, these places will be very difficult to always monitor, leaving the organization exposed to leakage of sensitive data or documents

Our Biometric Access Control product line is consisting of Stand-Alone Biometric Access Control Systems with Face Recognition, Fingerprint Recognition, Finger Vein, RFID Recognition, Palm Recognition. In addition, we have IP-based Access Control Panels, Access Control Readers and accessories with web application and mobile app for hassle-free access control management.

The solutions offered include:

Biometric Time Attendance System

Smart Hotel Locks

Access Control System

Security Parking Management Solution

X-Ray Baggage Scanner

## EPABX/Intercom System

Dynamic enterprise environment requires smarter communication solution for diversified roles of employees. Flexible device usage and round-the-clock connectivity is the need of the hour for the mobile workforce in order to have consistent in-office experience while working from home, between appointments or while on the move. Increasing competition, flexible work places and timings give rise to the need for more collaborative communication solutions for in-office and mobile workforce.

We provide Unified Communication Solution engineered on four pillars of Collaboration, Communication, Messaging and Mobility to enhance customer convenience and business productivity. With its intuitive interface and built-in real-time features of Video Calling, Email Integration, Presence Sharing and BLF Keys, It is designed to overcome geographical, communication device and user-accessibility barriers with a single platform solution.

## AV Conferencing System

We offer effective Unified Communications and Virtual Collaboration services and Audio-Visual solutions that aid better personalized experiences to the modern workforce. Our AV and collaboration services ensure seamless and effective communications through phone calls, video conferencing, within a business promoting its growth. Our video conferencing solutions enable high-quality video meetings that allow integration with existing tools and technology, and workflows for an uninterrupted user experience.

**Audio Setup for Meetings and Conferences** We offer a complete range of audio solutions for all types of conference halls and meeting rooms. Our audio setup ensures the communication is crystal clear.

**Video Conferencing**

**Smart Class room Design**

**Meeting Hall Design**

**PA System**

## Fire/Intrusion Alarm System

Our Fire alarm and intrusion alarm systems are the best at catching intruders with freedom from annoying false alarms. It's like nothing really happens. Keeping the wrong people out is the goal of every security system. But when your facility is at risk, you want to know that your intrusion system will perform. We deliver the most flexible and reliable intrusion products. With detectors that make the correct decision every time to highly capable systems with the flexibility to meet different requirements, we help to protect properties, assets and most importantly, people. We maximize peace of mind. So whatever happens, nothing really happens.

Intrusion detection is a delicate balance between responding to real security breaches and ignoring costly false alarm sources. Our state-of-the-art motion sensors provide best-in-class catch performance while virtually eliminating false triggers such as strong drafts, moving objects, and the presence of pets.

Advanced design features ensure an installation that is both fast and more reliable.

# Service Offered
